

Hello, everyone. I am Ray and studied at the CJS in Spring 2024.

Teachers at Nanzan are really kind. I am grateful that they always took time to answer my questions after class, and I want to express my gratitude to the teachers now. I started studying Japanese from scratch in January this year (2024), and thanks to my teachers and friends, I became able to speak Japanese.

I came to Japan to see my friends this time. I will graduate from my University in Hong Kong next year, and I am planning to become a biology teacher. I really enjoyed studying abroad, so my dream is to move to Japan in the future. People experience a lot of things when they study abroad. For me, I think the time when I was studying abroad is one of the most pleasant memories of my life.
